regard that existing regulations for the supervision of milk production and meat preparation should not be relaxed. It may be depended upon that the Society will give the utmost significance to this report, will ensure that there is no relaxation by any means. As in England, so it will be here. In the face of such information, it is not too stringent supervision is an absolute necessity. We have a strict system, but it is questionable whether the inspecting staff may not require more information. It is not too far to know beyond doubt that there is a great deal of tuberculosis amongst our dairy herds. While that is so we are continually running a race with the disease.

The inspection must be thorough and strict if it is to be effective, and the health of the community guarded properly. Nothing could be more certain than that the dairy herd is the likely source of infection, for humanity will otherwise never be free of this disease.

It is a coincidence that, together with the publication of this report, appears an edition of the complaint of the Wagga dairymen against the administration of the Dairies Supervision Act. At first sight the two might seem to be linked together, but the electric and the general feeling would not be one of sympathy with the dairymen. Yet this is not so. As we understand it, these men are not at all in the wrong, and their complaint means; that is, the very essential examination periodically of their herds in order to ascertain their health. It is only a very small number of herds that are found to be faulty of that. The average dairymen, we

ITEMS.

Complaints are made in Victoria that some of the draught horses recently imported from New Zealand have spread an infectious disease amongst mares.

What must be nearly a record shearing will take place in Central Queensland. Combemartin and Wellshot are practically one shed and shear 280,000 to 290,000 sheep annually will be shorn.

The last six months' operations of the Coonawarra Co-operative Dairy Company, Ltd., mark substantial increase of business. The firm's output exceeds the whole production for other years 1906 or 1907, and amounts to 1,000,000 lbs. with a net profit of £10,000 producing 100 tons 15cwt 43lb butter, and the value of £102,224 12s 10d.

During the half-year ended June the Melbourne butter factory turned out 1544 tons, an increase of 448 tons butter, compared with the corresponding period last year. During the season 1674 boxes of butter were exported, and on this a deficiency is expected. The trading account showed butter sales aggregated £17,800; output milk £2,300. The aggregate for the half-year was £205.

Show judging by pairs was condemned at the annual meeting of the conference in Victoria. The Director of Agriculture regards the system as scarcely feasible, and pointed out

The Inverell P. and A. Association has arranged at its offices for a permanent display of produce, fruit, minerals, etc. in order that visitors to the town might be able to form some idea of the district's capabilities.

A successful sub-artesian bore has just been put down by Messrs. Maunder Bros. on Ringwood station, near Gondolbin. A fine supply of good water, rising to within 180ft of the surface, was struck at 230ft.

It has to be popularized this year. The Washington Experiment Station has been successful in realizing its value and for the Plant Laboratory in California 20,000 nuts have been raised in the last year. I had the pleasure of selecting these nuts from a quantity obtained from Mr. Austin's cultivators' trees at Rouse Hill, N. S. W.

**STOCK OF THE PIPELINE ISLANDS**

The Government of this State have been informed by the Acting Prime Minister of the Colonization of the Government of the Philippines to admit dairy and breeding stock from Australia, provided such stock are accompanied by a certificate of health from a veterinarian by the Chief Quarantine Officer estimate by the Chief Quarantine Officer.

The shipping shippers of stock from this State may obtain all necessary information upon application to the office of the Chief Inspector of Stock, Sydney.

**STOP LOADING.**

Mr. C. C. C. writes:—The bottom of all this railway bungle is the general arrangement of the railway. The goods and passengers were put up to date, and have all consignments classified and have separate sale markets. Where everything is in its proper place, such as potatoes, pumpkins, carrots, and onions, are at present congesting our limited space. The goods with arms and legs and limbs are at present congesting our limited space. We want a central market in this position as not to seriously interfere with railway traffic, and which land can be purchased at reasonable rates, and the railway to

which grows peas for seed, and present prices for the product are: Blue, 3s 3d to 3s 6d; grey, 3s 3d to 3s 6d per bushel of 60lb. It should therefore be the duty of the grower to ascertain what kind of a market there is before it is gone in for too largely. Assuming to be the average English yield of 304 bushels is reached in England, and, moreover, the peas are well-matured and of good quality, where only 100 bushels are grown, which with the climate and soil, the margin of profit is very small at the 3s 6d rate on the Sydney market when cartage and freight are considered.

Harvesting, too, is a business which can only be learned by experience, and unless the weather conditions are favourable at the time of ripening and curing the marketing value of the product will be materially

[illegible]

## ERADICATION OF LANTANA

WINGHAM.—At the last meeting of the Stewart's River Progress Association Mr. L. J. Wingham proposed a letter be sent to the Manning Shire Council, asking that body to take steps to eradicate "lantana" on Crown lands. It was pointed out that it is absolutely useless for private landowners to take steps to eradicate the pest unless adjoining Crown lands also receive attention. Flood-waters and

**RHODIA LAYERS.**—At the annual meeting of the local branch of the South Coast and Western Rhodesia Milk Producers' Association, held on Monday evening last, the following officers were elected:—President, Mr. J. H. G. Smith; Vice-President, Mr. J. H. G. Smith; Secretary, Mr. J. H. G. Smith; Treasurer, Mr. J. H. G. Smith; and a number of other officers. The meeting was held at the Rhodesia Hotel, and was attended by a large number of members.

**LOCAL MILK SUPPLY.**—The Rhodesia Milk Producers' Association has been successful in securing a contract with the Rhodesia Milk Company to supply the local market with milk. The company has agreed to supply the local market with milk at a price of 1s. 6d. per gallon, and to deliver the milk to the local market at a price of 1s. 6d. per gallon. The company has also agreed to supply the local market with milk at a price of 1s. 6d. per gallon, and to deliver the milk to the local market at a price of 1s. 6d. per gallon.

**DISTRICT ITEMS.**

**BALLINA.**—In another example of the money there is in Bourke, the case of a Tinianah farmer is cited. From two to three years ago, the farmer had invested 70 bags of beans, and his average return was 25s. per bag, making a total of £175. He had then invested 70 bags of beans, and his average return was 25s. per bag, making a total of £175. He had then invested 70 bags of beans, and his average return was 25s. per bag, making a total of £175. He had then invested 70 bags of beans, and his average return was 25s. per bag, making a total of £175.

**BATHURST.**—Mr. C. J. Sanderson on Tuesday inspected the stations on the Bathurst and Sydney Railway, and found that the district like this the number was comparatively low.

**HILL RAILWAY.**—Within 100 yards of Remy's Hill railway station olives were grown last season, free from disease, weighing over 200 lbs. per acre. The olives were grown on the hill, and were of the variety known as the 'Hill Olive', which grow well at Prospect, Silver Hill, and Remy's Hill. The olives were of the variety known as the 'Hill Olive', which grow well at Prospect, Silver Hill, and Remy's Hill. The olives were of the variety known as the 'Hill Olive', which grow well at Prospect, Silver Hill, and Remy's Hill.

**GRAPE.**—The vines are about seven years old, but are paying handsomely. This property is situated on hard gravelly ridges, the very opposite to his neighbors, yet the returns are quite equal to those of Davenport Bros. The varieties of apples grown are chiefly Granny Smith, Rome Beauty, Fanny, and Five Crowns. The peaches are of the variety called "Big Barbara," and is a Italian variety, which bears cherries, gooseberries, raspberries, and currants flourish throughout the district as well as at Ixliathorne.

**BREWARRINA.**—On Monday 253 bales of wool left by train for the metropolis. The

[illegible]

Considerably increased arrivals of new-laid eggs the present week, and large quantities from the Clarence and other rivers, caused prices to the extent that the cold storage birds were already availed of, the most pleasing feature being that so far the suburban new-laid eggs are those being stored, the Northern being put on the market. The latter sort at the present time are good for all purposes, a majority being ungraded and some dirty new, but look well when taken out of the cold-rooms. During the

Some poultry notes from abroad.

The Purdue University, Indiana, mentions that the value of 12 million dollars was lost in 1934, but that 2 million dollars were recovered by means of marketing.

The American poultry breeder, calls attention to the fact that poultry-keeping in America is not growing so fast as in Europe, and that the latter has obtained the advance in prices, and says that during the next five years there will be the possibility of a considerable advance in prices, as ever seen.

From the Capetown and West. Africa Poultry Society recently waited on the Minister, General Botha, for the purpose of asking him to appoint a poultry expert being appointed. Their contention was that the Government should appoint a poultry expert, intelligent, capable, and that farmers required the Government as to the better grading of their products.

General Botha stated that a poultry expert should be appointed almost immediately.

The Dutch Poultry Society, Cape Town, in a paper says that some years ago a considerable association held an agricultural exhibition in Holland, but finding that this exhibition was not to the advantage of the poultry breeders, they gave it up.

The Canadian paper adds, whilst the tendency

10,900 cases of *Salmonella* and 10,000 cases of *E. coli*. The fowls sold at 2 to 6 each, ducks at 2 to 3 1/2 each and turkeys at 3 to 4 each. In 1982 Canada exported to England 1,100,000 hundred eggs, of the value of £136,000. At year practically none were shipped, but considerable importations arrived from Russia. Egg consumption is the explanation. We declare in Philadelphia have been secured in three months imprisonment for selling rotten eggs and other adulterated eggs £160 for the same offence. The judge stated that this traffic in "rotten and speckled" eggs had been broken up.

**NOTES.**

Mr. L. Smith reports that he has received for Mrs. N. Eddy, a blue and tan Yorkshire terrier dog puppy, bred by Mr. J. L. Hughes.

Mr. R. Kaleski, hon. secretary of the Cat and Sheep Dog Club of New South Wales writes that efforts are being made to revive interest in the club, and that the members

will shortly be called together.  
The Ladies' Kennel Club committee met Friday. The business was the selection judges for the coming show.  
One of the new vice-presidents of the Kennel Club is Mr. H. M. Bomer, secretary of the Royal Agricultural Society.  
Mr. G. Chalkin, of Coolabah, has secured from Mr. R. Kalecki a handsome cattle bill (Evans and Vaseley strain).

Mr. E. Scully, of Fyrmbe, has lost his well-known foxhound Fleet Admiral, which was poisoned while on the chain. This dog was well bred, being by imported Nobleman Lancer.

Another fancier of hounds has also had luck. Mr. A. Lofberg, of Gordon, reports a mysterious disappearance of those two great foxhounds Ben and Marcus, and also the hound Bear. Each of these hounds is a sub-

Mr. S. Hordern has transferred to Mr. J. Dickson a deerhounded bitch puppy by champion Ayrshire (Imp.)

Next Saturday the Bulldog Club and the Fox-terrier Club will hold respectively

Mr. G. S. Chapman, secretary of the Rem-

Club of New South Wales, reports that Mr. R. Russell presided at last Thursday's committee meeting. There was a full attendance. The profit of "Marvare" was granted to Mrs. V. Ryan of North Sydney. Messrs. L. Jones, V. Shepherd, F. Roberts, W. Hunt, and C. Bacon were elected members. A special prize of one guinea was offered for the best essay on the show, written by a school-child under 15 years of age. The secretary reported that show entries were coming in well, and that the special prize list was unusually attractive.

The Victorian Poultry and Kennel Club held a meeting of members recently. The hon. treasurer reported that the sum of £300 was required to free the club from debt. Effort will be made to raise the amount of the deficiency.

The non-secretary of the A.H.C. reports that keen interest is being shown in the club's forthcoming championship show. The entries are coming in very satisfactorily. A meeting of the committee will be held during the week, when the appointment of the show officials will be made.

"A.H.C." writes:—Mr J. H. Rose concludes his last note with: "I will be always fond of claiming cattle dogs as the most useful dog."

we have. " That is exactly my contention, and is all I want agreed to. I dissent to the preceding portion of Mr. Roosevelt's reply, he seizes upon "points" which are not there—that of my alleged "jump from sheet to alligators." Well, I leave those who refuse to follow the real sense of it, and not contention of it. If your correspondent has lived as many years as I have adjacent to the

also agree that mongrel cattle dogs are often used in the country for driving flocks of mongrel sheep dogs—99 out of every 100 country drovers only knowing the difference when an outlaw proclaims himself a hopeless "heeler." They speak of dogs being "too hard," but they know no more than that. And for the most, unless "terrible hard" and incurable, still continue to use them.

The annual meeting of the Sydney Silky at Yorkshire Terrier Club took place at the Kennel Club rooms on the 27th ult. Mr. Johnson presided. The secretary's report showed that the club was in a sound condition, the funds amounting to nearly £16, at the membership numbering 35. The election of officers resulted as follows.—Patron, Dr. Stopford; vice-patrons, Messrs. V. Labadie and J. Labadie.

Coombe, H. Ekin, W. Walsh, G. Johnson, J. Hughes; president, Mr. J. Bothwick; vice-presidents, Messrs. R. Mason, R. Cookson, Hutchison; committees, Messrs. R. Thomas, Alexander, J. Westman, A. Jones, M. Douglas, C. R. Chapman; hon. treasurer, Mr. T. O'Loughlin; hon. vet. surgeon, Major Gribble; hon. registrar, Mr. R. Cookson. The club

**CENSURE OF SHEEPDOG TRIAL JUDGES.**  
 "K.T." writes:—After reading Messrs. King and M'Leod's letter in "Kennel Notes," one is forced to inquire if the comment upon the result of the trials "Do we not look to them to express a fair and unbiased opinion of each event as they have been entrusted to judge?" I have heard several converse with Messrs. Quinn and Leake, and they have admitted that they had been told that the same were not fraught with the bad taste and "gross inaccuracies" your correspondent has pointed out. I have seen King and M'Leod run off a list containing almost every name of the drovers' companies, and I have seen the same list in the hands of the alleged pastmasters in the art of training and working sheepdogs." In reply to this, I have to say that I am well-satisfied that many drovers follow their calling by force of circumstance, and not that they are careless and ignorant of the dog that work for them." Look at the way the great majority of drovers treat their dogs, and you will find the conclusion of the letter is correct.

Of the cattle dogs and sheepdogs of the South Wales type. The others were fairly stout, but they did not look as if they were trained to work. The local specialists are dropped-eared and heavy in construction. It was quite a treat to see a few of the St. Bernard dogs of Sydney, Ponto, the only one shown, has a good head with typical expression, and plenty of hair about the eyes. Christian Eclipse again won, his head is not his fortune, but he is a runner-up. Souppit Coat, a bitch, has a head extra long, with a well-filled-in face, and a good chance of being a winner. I have seen his chances of winning in bitches fewer easily won the challenge, but has a splendid head and a fine frame. Irish terriers were a poor lot, and no good ones were shown. The best was Miser, the winning dog, is a five-year-old, and is a successful bitch D. Nell. Ph Peger is the successful dog of the day, and he is a five-year-old. Over. Scottish terriers made a nice collection. The challenge dog, Willy Wally, is a good one, and Mr. T. J. is a good one.

## CHEAP FRUIT

### LORD MAYOR TO INTERVENE

The Lord Mayor said yesterday morning that he had been approached by a number of fruitgrowers from all parts of the State with a view of considering what steps should be taken to give consumers greater opportunities of obtaining wholesome fruit at a reasonable cost, and at the same time give the grower a fair return. The subject appealed to the Lord Mayor as being one of great public importance, and he has accordingly arranged to meet the fruitgrowers in con-

### THE LIVERPOOL PLAINS CANDIDATES

Mr. Perry is not new to Parliamentary paigning. He preceded Mr. Horns in the representation of Liverpool Plains in the assembly. He was president of the Farmer-settlers' Association.

Mr. Ashford is an old Parliamentarian. When Mr. Willis resigned to run for the Federal election, Mr. Ashford contested the vacant seat, and won it. He was defeated at the last general election.

rod foot-terriers shown were Kenneth Noble, Mercedes Cassar, Ingelwood Germ, and Charles Caesar.

Another good section at the Brisbane show was the class of English bulldogs, in which the old Sydney fancier Mr. Arthur Noyes still gets blue ribbons. He was the bitch champion, and his bitch, a fine one, got a blue too friendly with the cook. He also owns a quality dog, K. Count, Pumper-up and almost a champion.

On Monday and Tuesday next at the Terrier Hall, so that the matter can be considered in all its bearings. Representatives from the various clubs will be present, and the £50, and an elaborate agenda paper is in course of preparation, so that the London show will be a very important one. It is to be thrown considerable light on a complicated matter. The conference is to be held at the Terrier Hall on Monday, when Sir Allen Taylor will preside.

ner. The owner of the latter is Mr F. C. Parkinson, who has a capital cocker kennel, included in which are L. Snap, Snip, Don, Kit, and Pearl.

Greyhounds also made excellent classes. Two of the dogs and bitches entered the ring. The black puppy Bead or scored his first challenge, beating the open winner, Tracent Barb.

Forthcoming State Series Kearn for Lady Trysta, 415 p.m. ring to 415. All information from C. S. Stanley Summerhayes, 50 York street, whose students have won the first place in N.W. in the last four years. Very enthusiastic interest in the "GOLGRIFF" and local ladies' aid. Relieve Rheumatism and Gout. Sold everywhere, in 8d, 6d and 3 packets. -Adv.

# FARMER'S ——— SYDNEY
